# ACADEMIC INITIATIVES

## 1. Law Practicum Series

The Law Practicum Series was introduced to ensure that students are imparted with proper technical and industry-specific knowledge. Through intensive teaching and the use of practical, real-world examples, it aims to enhance understanding and bridge the gap between substantive legal knowledge and the challenges faced in practice. The practicum adopts a pedagogy wherein industry experts and legal practitioners are invited to deliver lectures on specialised and advanced subjects, enabling students to engage directly with real-world legal issues.

## 2. RGNUL Student Academic Assistance and Support Policy

RGNUL Student Academic Assistance and Support Policy (RSAASP) offers an opportunity for the academic growth of the student. The aim of RSAASP is to enhance the efficacy of the learning environment for students from diverse educational backgrounds. RSAASP is assisted by committees comprising faculty and student assistants. RSAASP encompasses a broad array of academic activities- access to support for resolving academic queries, acquaintance with the contours and requirements of the course, extra-tutorial assistance, comprehension of Project Work, aid for non-English medium/language related issues, guidance for research and practical exposure/training throughout the five-year B.A.LL.B. (Hons.) Programme. The Policy reflects the collaborative spirit at RGNUL as students and faculty coordinate for the management of activities. RSAASP ensures productive assistance to new students, facilitates initial transition to University studies, encourages inter-batch association and extends another avenue of learning in integration with the classroom environment.

## 3. Research Outcome Dissemination Series (RODS)

The Research Outcome Dissemination Series (RODS) is one of the initiatives by RGNUL to ensure high-quality research. RODS was introduced for the enhancement, dissemination, and amplification of quality research and the application of innovative findings with respect to real-world situations. It takes into consideration the interdisciplinary and quality legal and factual understanding of the situations via collaborations and partnerships with different organizations, including private and public organizations such as government departments, academic institutions and international and national think tanks, and other research institutions. The most striking feature of RODS is that it includes participation from all levels, including agencies, research scholars, students, and other professionals. Each session spans half an hour, where the initial half is devoted to understanding the research questions and the rest half-open to the discussion.

## 4. Interdisciplinary Teaching

Interdisciplinary teaching has been introduced to prevent stagnation of knowledge by encouraging the convergence of concepts from the social sciences with various fields of law. Different methods of teaching are being experimented with and implemented to strengthen this integrated approach. This enables students to develop a more practical understanding of the field while also helping them assess their areas of expertise and interest.
